

# Abdelkader KIARI

## Developer

*I am actually the CTO and co-founder of Tok'Art. But being unpaid, I am looking for a full time job as a Full Stack developer, mobile, software or even blockchain developer..  
If possible in Dubai, since I would love to relocate.*

## Computer skills

**Pools EPITECH (bootcamps)** C, C++, WEB (HTML, CSS, JS, MySQL), JAVA

**Academical Projects** Pushswap in C ( list sorting, performance oriented ), My\_Malloc in C (my version of the stdlib's function malloc) use of linked list, git as project manager, and according to EPITECH's coding convention.

Need4stek, in C and using V-REP, API and scripts . The goal being to create your own autonomous car that would be able to run around the circuit without hitting walls, going in wrong direction etc. (use of git and coding conventions)

Dante, in C, tool that generates and solves mazes (git and coding conventions ).

Job\_teaser (job offer platform with recruiter and client sides) HTML, CSS, JS, MySQL, Apache, CentOS (vm). Work on different Linux environment (Ubuntu, fedora, CentOS, etc.). Use of git, coding conventions.

**Personal Projects** Fast\_learner in C (allow to establish and stock the digits memorization system of the user). Use of agile method (regularly thinking about the needs and priorities to adapt the following rushes), git and coding conventions.

My\_Chess C++, simple chess game, using stockfish as AI for the opponent. No special methodology, use of git and coding conventions still.

My\_pomodoro JS, simple software that helps the user to optimize his time thanks to reminders, more than that, stocking data makes it more visual to the user. No methodology, use of git and coding conventions.

## Education

**Developer Web Fullstack / 3W Academy** Toulouse

Since October 2020

RNCP title level 6

**Expert in Computer science and Innovation / EPITECH** Toulouse

From September 2017 to June 2020

Learning development (software, web, network, ...) through pools (bootcamp) and projects.

**Baccalauréat Science - specialization physics and chemistry / Lycée Paul Sabatier**

Carcassonne

2011

Mention good enough

## Work experience

**CTO - Tok'Art / Tok'Art** Toulouse (remote)

Since October 2021

Chief technical officer of Tok'Art, NFT marketplace.

Front end, platform with React.

Backend using nodeJs, express.

Smart contract with solidity, and ERC721 token, layer 2 solutions (matic network)

**Fullstack Web Developer / Letellier Développement** Toulouse

Since January 2021

Being alone, i take care of everything related with our website or database.

That means creating a new servers, migrating the website, managing the servers (web, FTP, SFTP, SMTP), designing and adding pages and features (API + Backoffice), SEO, etc.

## Languages

**English** The 3 years i could pass the TEPITECH (equivalent of TOEIC), got consistently between 840 - 900

**Spanish** Lived 4 years in madrid studying odontology in spanish

**Arabic** I can talk my family's dialect, and I try to learn the true arabic, reading the Quran

## Interests

**Dev** National winner of the IONIS project Week in partnership with Nike ( team project ). Involvement in many events : Global Game Jam, Hackathon etc.

**Chess** I learned the rules very young but really started 3 years ago, if i want a break from coding, that's what i would do first

**Reading (or podcasts)** My favorite book : Napoleon joue de la cornemuse dans un bus written by Jean-Yves Ponce

**Sports** I love F1 and tennis, practiced a little bit of everything, but mostly 10 years of martial arts

**Personnal Développement** Memory Palace, memorizing digits (Dominic O'Brien system), meditation, etc.
